

Negative Testing Cheat Sheet

1. Login Fields

- **Empty username/password** → try to login without filling.
 - **Very long username** → e.g., aaaaaaaaa... (200+ characters).
 - **Special characters** → !@#\$\$%^&* ()
 - **SQL injection attempt** → ' OR '1'='1
 - **Whitespace only** → " "
-

2. Email Fields

- **Missing @** → usergmail.com
 - **Double @** → user@@gmail.com
 - **No domain** → user@
 - **Only domain** → @gmail.com
 - **Extra dots** → user@..com
-

3. Date Fields

- **Impossible dates** → 32/01/2025, 29/02/2025 (not a leap year).
 - **Wrong format** → 2025-99-99, MM-DD-YYYY when expecting DD/MM/YYYY.
 - **Letters** → abcd.
-

4. Text Fields (Name, Address, etc.)

- **Very long strings** (e.g., 1000+ chars).
 - **Numbers in a name field** (e.g., John123).
 - **Emoji / Unicode** → 😊🔥
 - **HTML tags** → <script>alert('test')</script>
 - **Only spaces** → " "
-

5. Numeric Fields (Phone, Salary, Age, etc.)

- **Letters** → abcde.
- **Special chars** → !@#.

- Negative numbers → -123.
 - Decimal when only integer allowed → 45.67.
 - Exceeding max length → 9999999999.
-

6. File Uploads

- Uploading an invalid file type (e.g., .exe when only .jpg expected).
 - Uploading huge file (e.g., > 10MB if system limit is smaller).
 - Empty file upload.
-

7. Cross-Browser / Device

- Resize browser window → check UI responsiveness.
- Try in Chrome, Firefox, Edge.
- Use mobile view (F12 → responsive mode).
