Exploratory Testing Session Report

Session Info

Tester: Khadija

Date: 21-08-2025

Application/Module: OrangeHRM -> "Add New Employee" from OrangeHRM

Charter: Explore "Add New Employee" form to assess incorrect data formats, empty fields, very long strings and invalid special characters in 30 minutes session.

Time-box: 30 minutes

Environment

App URL / Version: https://opensource-demo.orangehrmlive.com/web/index.php/auth/login

Browser / OS: Google Chrome 139.0 / Windows 10

Findings

#	Test Idea / Step	Expected	Actual	Result (Pass/Fail)	Severity	Notes/Screenshots
1	Add employee with blank fields	Should show validation errors	Errors displayed	Pass	_	See Screenshots/add_user_blank.png
2	Enter long string (500 chars) in "Username"	Should limit the character length	Error displayed "Limit should not exceed 40 characters"	Pass	_	See Screenshots/add_user_username_longString.png
3	Enter password without digit	Should display error for weak password	Error displayed "Your password must contain minimum 1 number"	Pass	-	See Screenshots/add_user_password_noDigit.png
4	Valid input (name, password)	Should accept and display correctly	Works as expected	Pass	-	See Screenshots/add_user_validInput_1 & add_user_validInput_2

Summary

Key issues found: None observed during this session.

Risks observed: *No major risks identified. System appears stable for tested scenarios.*

Next steps / Future charters:
- *Explore other modules (e.g., Leave Management, Admin → User Roles).*
- *Test on a different browser (Firefox/Edge) to check cross-browser consistency.*
